

DISCOVERY ONE
KIMBERLEY CRUISES

WATERFALL – Broome to Darwin

Cruise 2: 14 night package

Saturday March 29 to Saturday April 12 2025 - \$12,500 pp

Package includes:

- Transfer from Broome to Broome Port on March 29
- Cruise starts March 29
- 13-night cruise from Broome to the Berkeley River from March 29 to April 11
- Seaplane flight from the Berkeley River to Kununurra on April 11
- One night's accommodation in Kununurra at The Kimberley Grande (or similar) on April 11
- Transfer from the accommodation to Kununurra Airport on April 12
- Air North group flight from Kununurra to Darwin on April 12 (or receive a \$250pp flight credit and make your own travel arrangements from Kununurra)

Driving Option: Leave your vehicle safely stored in Kununurra (Kimberleyland The Waterfront Caravan) or Broome (Broome Caravan Park in Wattle Drive). We'll provide a \$250pp account credit so you can book a flight between Kununurra and Broome.

Explore the untouched wilderness of Australia's Kimberley coastline – a myriad of beautiful bays, inlets, beaches, reefs, rivers and of course spectacular waterfalls.

March 29: Broome boarding at 9am

A morning transfer to Broome Port. Please let us know where you are staying in Broome for ease of transfer. Enjoy a welcome drink and a briefing by the Captain before you settle in, become familiar with your surroundings and relax as we cruise around Cape Leveque and the start of the Buccaneer Archipelago. You are about to begin the journey of a lifetime!

**** You need to be in Broome on 28 March ****

Silica Beach:

Near the entrance to King Sound lies Silica Beach which boasts pure white sands and clear blue water. It's the kind of beach one imagines you should find on an island paradise. If the crew think it's safe, enjoy a dip in the shallows or just take a walk on this fabulous beach.

Talbot Bay & the Horizontal Falls:

Talbot Bay is home to the famous Horizontal Falls. The region's massive tides create a spectacular scene, sending huge volumes of water rushing through two narrow chasms in the land formation when the tides reach peak flow in

both rising and falling conditions. With up to 10m of height difference between the waters of each of the two inland bays and the sea, the water gushes through creating whirlpools, boils and raging currents. In Cyclone Creek, the incredible marine life includes impressive Tawny Nurse sharks which often come to greet Discovery One.

Montgomery Reef:

North West of Raft Point is Montgomery Reef. This 400 sq km reef can emerge up to 4 metres above the waterline at low tide, creating a visual spectacle of waterfalls and sea life. Several small islands dot the reef and support rich mangroves, crocodiles, turtles, birds and fish.

Sampson Inlet:

Further north is Sampson Inlet which leads into a monsoonal rainforest pocket with almost permanent fresh water. Many previous passengers have called this the most beautiful spot on the Kimberley coast. Keen photographers should remember their cameras!

Hanover Bay & Camden Harbour:

Within Hanover Bay are the pristine sands of Hanover Beach. It is here, in 1838, that Lt. George Grey unloaded his Timor ponies and began the first land based expedition of North West Australia in search of the great inland sea. The journey soon ended when he was speared by Aborigines. Despite this, Lt Grey reported back positively describing the area as 'lush and fertile'. This glowing report encouraged a group of optimistic farmers to establish a new settlement in Camden Harbour in 1864. This was a total disaster from the start. The ruins of that settlement, which lasted only 9 months, can still be seen and the graves of some of these tough pioneers can be found on nearby **Sheep Island**.

St George Basin & the Prince Regent River:

Within the St George Basin are two flat topped hills, Mt Trafalgar and Mt Waterloo, which provide a spectacular backdrop as you cruise to the mouth of the Prince Regent River. This river is the eroded remains of the longest single straight lineament in Australia, making it yet another geological wonder. Get your camera ready as you experience some spectacular scenery, flora and fauna on our journey down this remote and pristine waterway, concluding at the majestic King Cascade Falls. This magnificent site is where American model, Ginger Meadows, was fatally attacked by a crocodile in 1987, a horror story which has been retold around the world. Keep an eye out for crocodiles as you view these magnificent falls which cascade over fern covered tiers in breathtaking splendor.

Careening Bay:

Careening Bay is within the southern part of Nelson Bay where, in 1820, Phillip Parker King careened the vessel HMC 'Mermaid' for repairs whilst surveying the Australian coastline. His carpenter carved the vessel's name into an ancient Boab tree which is still visible today 200 years on!

York Sound & the Hunter River:

Prince Frederick Harbour lies within York Sound and it is here that we find the Roe and Hunter River estuaries. This area boasts sensational scenery, with cathedral-like gorges and eroded sandstone features such as the Indian Head at the entrance to the Hunter River.

Naturalists Island is situated here and, during the cruise season from April onwards, it is possible for our passengers to enjoy a helicopter flight from Naturalists Island over the geological wonder of the Mitchell Plateau with its stunning tiered falls.

King George River:

The King George River flows into Koolama Bay and is bordered by wonderful sandstone coloured cliffs. It is here you will see the spectacular King George Falls; the tallest falls in Western Australia. Be prepared for a shower! At this time of year the spray from the falls reach up to 500 meters down the gorge and the thundering falls add further excitement.

Koolama Bay:

Originally named Rulhieres Bay, Koolama Bay was re-named for the ill-fated 340ft vessel 'Koolama' that was attacked by the Japanese during WWII. After the attack she made her way into the Bay, dropped off her passengers and then travelled to Wyndham where she sank after another bombing raid.

April 11: The Berkeley River & Kununurra:

The stunning red ochre cliffs bordering the Berkeley River dominate the scenery as we cruise through this magical region of beautiful waterfalls and freshwater pools. The Berkeley has extensive smaller creeks feeding into it and drains the Seppelt and Collison Ranges and Gardner Plateau. It is here that the cruise concludes. Boarding a seaplane, you will enjoy a scenic 1 hour flight to Kununurra followed by a transfer to the hotel where accommodation has been arranged.

April 12: You will spend the morning in Kununurra as free time before a hotel transfer to the airport for your flight from Kununurra to Darwin.

Something Extra... This itinerary lists all the places you can reasonably expect to visit on your cruise between Broome and the Berkeley River. It is likely, however, that there will be additional places of interest visited on the actual cruise, time and tides allowing, which is why we prefer not to give you a day by day itinerary.
